Introduction:

Vizro technologies was founded to supplies mobile phones to network Operators all over the GLOBE as well as to end users. We have expanded our headquarters from Canada, China, and Malaysia / Singapore to establish offices in the America, Europe, and Asia to support this growth. The Vizro proposition is based on three strong principles:

1-We place Network Operators at the forefront of everything we do. Vizro works with Operators in a very different way, offering them originally designed, technically advanced products with extensive customization possibilities to support their own brand development.

2-We challenge “Convention” by “Innovation” not only in design , features but in by driving changes that excite both Network Operators and end users. Vizro Technologies specailises to produce innovate or design any kind of Mobile Technologies to fulfill consumer requirements. We exclusively work for Mobile Phone Operators and Cellular Companies.

- from a superb range of phones leading the market in look, style, features, finish and performance.
- the most extensive customization based on the freedom of individual design, style, software, features and branding.
- how and when with flexibility and speed of delivery to meet the most demanding customer schedules.

Vizro Technologies, one of leading manufacturer and design house in cellular and VOiP Phones, the key focus of Vizro Technologies is to provide High Performance in affordable cost mobile phones technologies all over the Globe.

All Vizro Products are authorized with official Vizro Warranty, for all Networks (Optional), and to End Users. This is not end. Vizro Technologies are planning setup, Franchises and Distribution Network, all of our distribution offices working 7 days a week.

Connecting ways
